

The Conscious Collection

The Conscious Collection is here and it has a story...
Let us tell you about it.

“And with the help of the wind, The Flower spread its seeds of love and hope...”

Inspired by Indonesian Batik and Sacred Geometry, the powerful design we call The Flower stands at the centre of this collection.

Batik is an ancient art form in which nature and sacred geometry come together in beautiful designs and patterns, most commonly used in traditional clothing.

Sacred Geometry can be found everywhere around us, as the 5 basic shapes make the foundation for everything found in nature, from the trees and the flowers down to our very own DNA.

This is why The Flower is here to remind us that the beauty we can see around us can also be found within us. Now it is up to ourselves to remember that inner beauty.

We invite you to celebrate life with us, smile, have fun and remember who we are and always will be.

The Conscious Collection encourages you to open your eyes and look consciously at all the beauty that surrounds us. May it empower you infinitely.
